SUMMARY

I am an enthusiastic programmer, particularly when adapting and monitoring networks, and take great pleasure in seeing both the physical and digital results.

Another area of interest is designing from concept through to prototype production of printed circuit boards. I have an analytical mind which enables me to be effective when problem solving or fault finding and am effective whether working individually or as part of a team.

EDUCATION

Diploma of Higher Education :

Combined science, 09/2019 - 06/2021

New College Bradford - Bradford

- Science- merit
- Game design - destination
- Law - pass

GCSEs, 09/2014 - 06/2019

Lightcliffe Academy - Halifax

- 7 GCSEs grade 5 and above
- BTEC business merit

Master of Science : Robotics and Automation, 2026

Manchester Metropolitan University

(current) - Manchester, England

- Coursework -
- AI systems
- Siemens insights hub programming PLCs
- IoT network security and protection
- Robotic science and systems
- Project management
- Digital manufacturing

Bachelor of Science : Electrical and Electronic Engineering, 2025

Manchester Metropolitan University

- Manchester, England

EXPERIENCE

NATO Research Assistant. , 06/2022 - Current

Self employed - Manchester, Greater Manchester.

- Programming an operating system for the management of micro controllers to be used in an early warning weather system regarding flooding and extreme temperature.
- Using LoRa WAN to create a mesh network to cover an at risk area with free space optics as central communication.
- Working with AI to create autonomous arial drones which will enable connection when network is broken.
- The design and printing of requisite circuitry.

Landscape Gardener (for university funding), 06/2021 - 02/2026

Chain Reaction - Bradford, West Yorkshire

- Maintaining machinery and company vehicles by promptly repairing issues and performing routine cleaning.
- Maintaining aesthetically pleasing garden designs by regularly mowing lawns, trimming hedges and feeding plants.
- Carrying out hard and soft landscape improvement projects, consistently exceeding customer expectations.

Electrical Apprentice, 07/2018 - 12/2022

Chris Rhodes electrical - Todmorden, West Yorkshire

- Utilised a variety of hand and power tools to efficiently complete tasks under tight deadlines.
- Maintained a clean and organised workspace to uphold high standards of professionalism.
- Cultivated strong colleague relationships by staying proactive and helpful throughout electrical tasks.
- Participated in site inspections to assess and document electrical needs and safety concerns.
- Attended professional development workshops to stay up-to-date with the latest electrical technologies.

SKILLS

Proficient in -

- Intel Quartus
- Field-Programmable Gate Array fault finding.
- Siemens insight hub
- Siemens NX
- CoppeliaSim
- Node-Red
- Auto CAD

- Multisim

- Unreal Engine

Also -

- Electrical installations
- Genarel electrical fault finding
- Critical thinking
- Electrical maintenance and upkeep

Coursework -

- Robotic automation
- Advanced analogue
- Advanced power
- Advanced digital
- IoT systems and networks
- Dissertation in Robotic Automation

HOBBY AND INTERESTS

Electrical projects – home robotics
Creating horror games in Unreal Engine
Node red projects
programming HTML games
Warhammer 40k
Model railways

- Auto Maya
- Matlab

CERTIFICATIONS

- M.Sc Robotics and automation
- B.Eng Electrical and Electronic Engineering
- IOT connectivity and cloud integration using LoRaWAN & Node - Red
- Level 3 Diplomas in Science, Law and Game Design
- 7 GCSEs grade 5 and above.
- CSCS Licence
- Mental Health First Aid
- Full UK Driving Licence
